

# A revolution you can hold in your hand

**HETEK**  
SOLUTIONS INC. 

Hetek's new methane detection technology  
saves time and reduces maintenance costs.

Introducing Hetek's new laser-based **Remote Methane Leak Detector (RMLD™)** – a revolution in methane detection and measurement. Using Tunable Diode Laser Absorption Technology, the new RMLD enables methane detection of hard-to-reach areas up to 30 metres away. The result is significant productivity gains of up to 50% over current Flame Ionization methods and reduced operations and maintenance costs. Conveniently packaged in a durable dust-resistant case, the RMLD is ideally suited for:

- Gas & Chemical Processing Plants
- Industrial Plants using methane
- Wellhead & Gathering Lines
- Natural Gas Pipeline Surveys
- Gas Installation Inspections
- General Methane Leak Detection
- Landfill Site Emission Studies
- Digesters & Sewage Plants
